NIDEC-SHIMPO CORPORATION

Future Creation of Richer Industries - For Ceaseless Development

NIDEC-SHIMPO developed and released Ringcone CVT equipped with an independent transmission in 1952. NIDEC-SHIMPO has continued to develop products meeting customer needs and produce new products on the basis of driving technology of reducers, etc. as well as advanced electronic technology and software development. NIDEC-SHIMPO's technical testing and reliability have been proven through the award of many prizes by the Japanese Machinery Society, including the National Invention Award. NIDEC-SHIMPO will offer ideal technologies and products by exactly meeting market demand for future development in various industries.

Reducer

Reducers and transmissions are essential as driving parts within factory automation robots, machine tools, or conveyor systems.

Measuring instrument

Tester

Used to measure "Strength" of all kinds necessary for R&D or QC, e.g. tensile strength, compression strength, switching strength, etc.

Reducer & transmission

Measuring instruments

PRODUCTS

FA Machinery

Ceramic devices

Others

Transmission

RX CVT that was successfully developed in Japan with the first independent transmission.

### electric potter's wheel

NIDEC SHIMPO is also the largest maker in ceramic machinery. It commercialized the first motor-driven pottery wheel in the world, showing market share of 80% home and 40% overseas. Besides, NIDEC SHIMPO is manufacturing and selling various ceramic products including electric kiln, positioning as top brand of total maker.

FA machinery and testers equipped with operating or measuring technology are the major fields of SHIMPO.

VRS series

High moment load type with high-precision

Can be mounted from the reducer side.

VRB series

High precision type

Can be mounted from the reducer side.

VRL series

General-purpose type

Can be mounted from the customer's machine side.

Applications

Printer
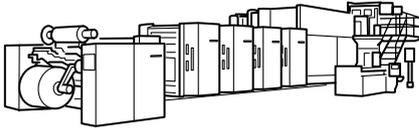

Gantry robot
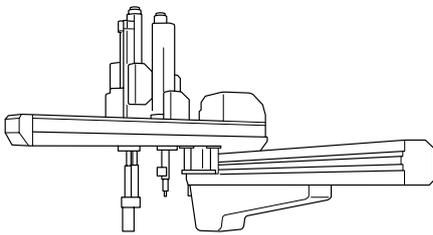

Packing machine(vertical pillow)

Dispenser robot
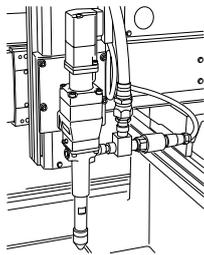

Turret head
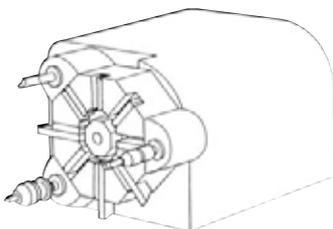

Conveyer-belt
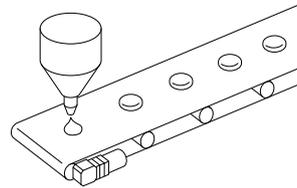

Auto packing sealing machine
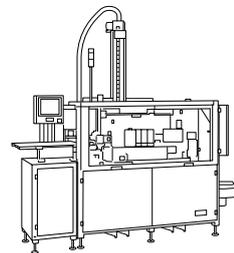

Packing machine(horizontal pillow)
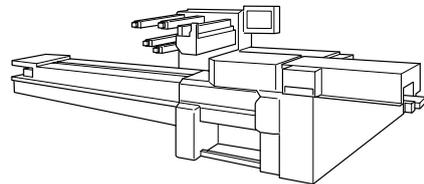

Loader robot
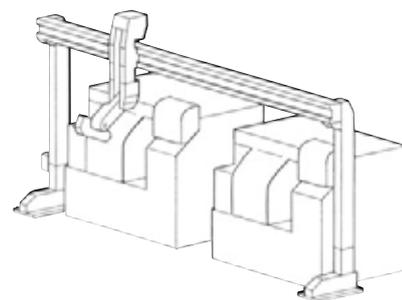

Attachable and applicable to a range of applications and devices

For servo motor

ABLE *REDUCER*

VRS Series

VRS series
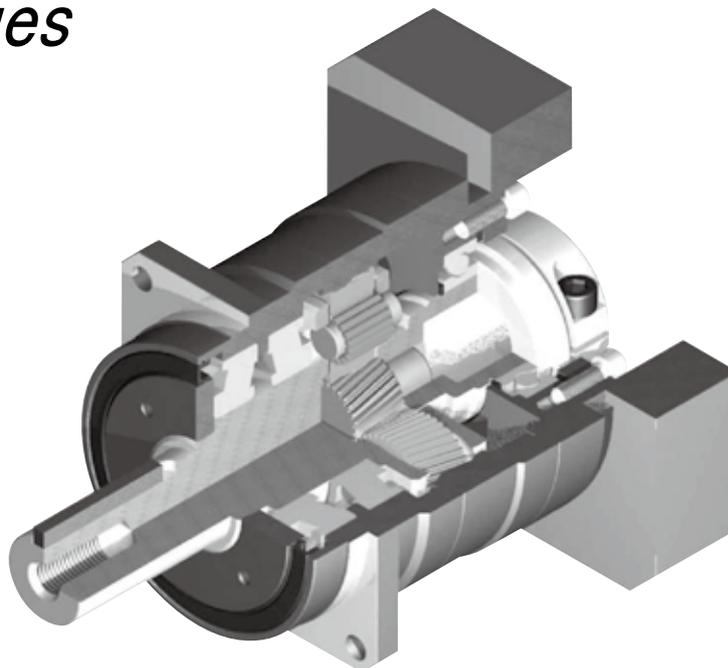

High precision

Standard backlash is 3 arc-min, ideal for precision control.

High rigidity & torque

High rigidity & high torque were achived by uncaged needle roller bearings.
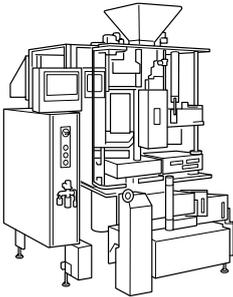

High load capacity

Adopting taper roller bearing for the main output shaft to increase radial and axial load.

Adapter-bushing connection

Can be attached to any motor all over the world.

No grease leakage

Perfect solution using high viscosity anti-separation grease.

Maintenance-free

No need to replace the grease for the life of the unit.
Can be attached in any position.

※ 1 With nominal input speed, service life is 20,000 hours.
※ 2 The maximum torque when starting and stopping.
※ 3 The maximum torque when it receives shock (up to 1,000 times)
※ 4 The maximum average input speed.
※ 5 The maximum momentary input speed.
※ 6 With this load and nominal input speed, service life will be 20,000 hours.
　　　(Applied to the output shaft center, at axial load 0)
※ 7 With this load and nominal input speed, service life will be 20,000 hours.
　　　(Applied to the output side bearing, at radial load 0)
※ 8 The maximum radial load the reducer can accept.
※ 9 The maximum axial load the reducer can accept.
※10 The weight may vary slightly model to model.

MEMO

SHIMPO

For servo motor
ABLE REDUCER
VRB Series
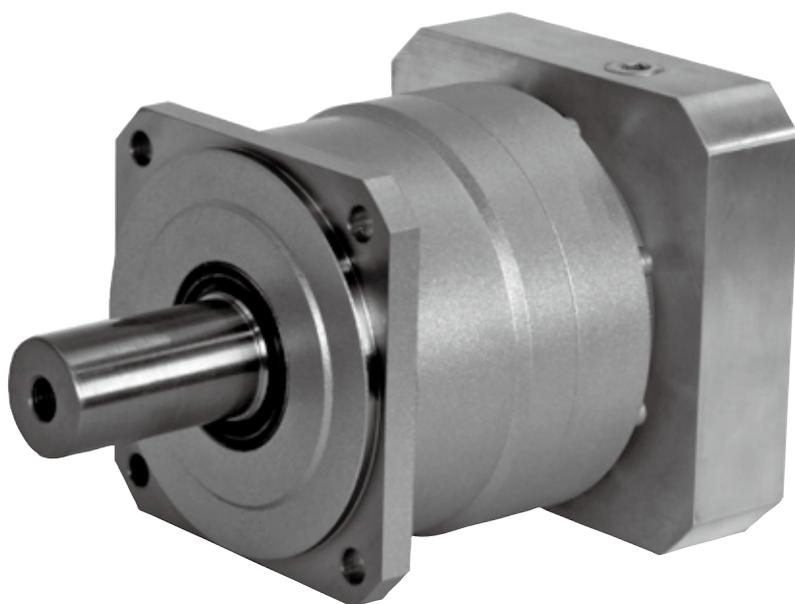

VRB series
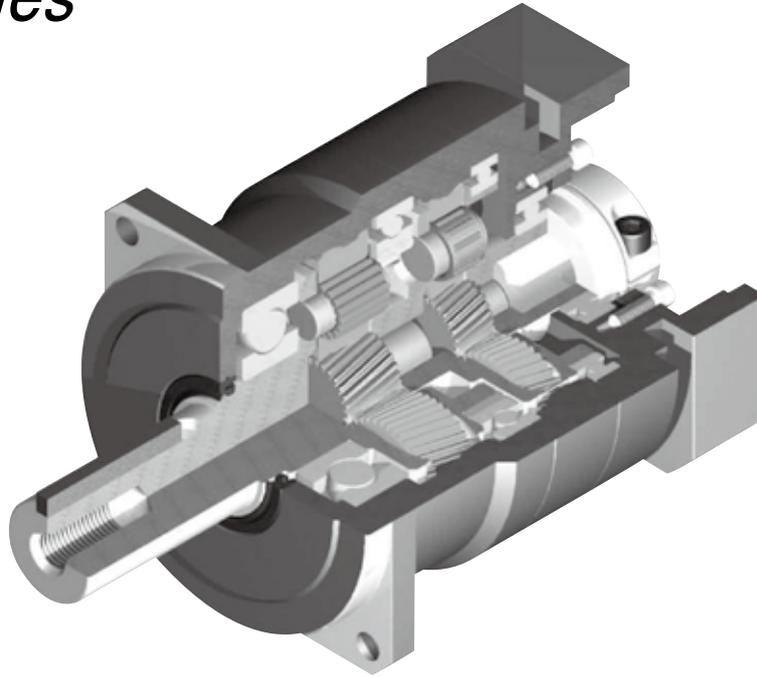

Quiet operation

Helical gears contribute to reduce vibration and noise.

High precision

Standard backlash is 3 arc-min, ideal for precision control.

High rigidity & torque

High rigidity & high torque were achived by uncaged needle roller bearings.

Adapter-bushing connection

Can be attached to any motor all over the world.

No grease leakage

Perfect solution using high viscosity anti-separation grease.

Maintenance-free

No need to replace the grease for the life of the unit.
Can be attached in any position.

VRB series

| V R | B | – 090 | – 7 | – K | 3 | – 19HB16 |

Mount code（※1）

Backlash　3･･･　3arc-min

MEMO

SHIMPO

For servo motor

***ABLE* REDUCER**

VRL Series
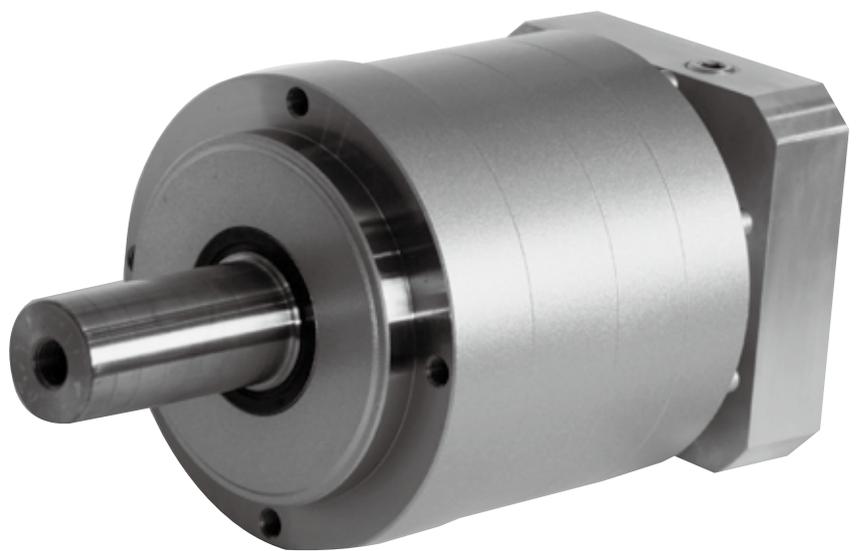

VRL series
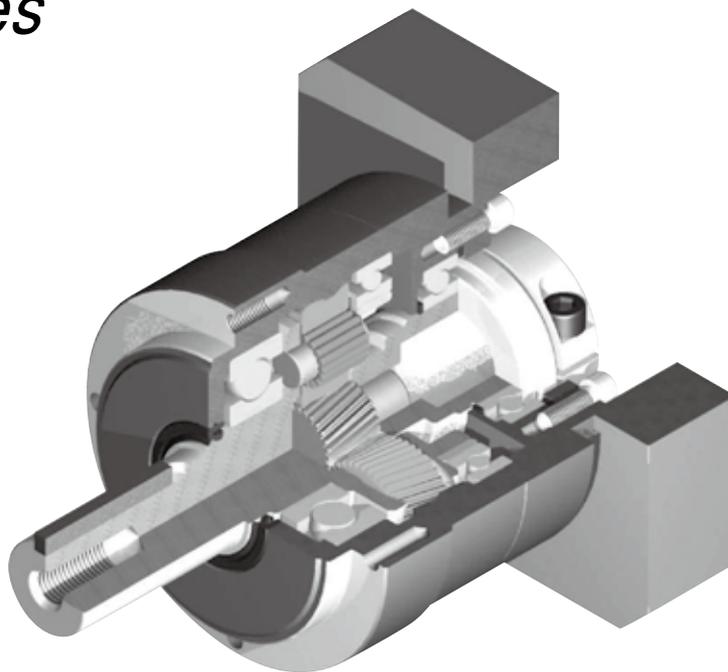

Quiet operation

Helical gears contribute to reduce vibration and noise.

High precision

Standard backlash is 5 arc-min, ideal for precision control.

High rigidity & torque

High rigidity & high torque were achived by uncaged needle roller bearings.

Adapter-bushing connection

Can be attached to any motor all over the world.

No grease leakage

Perfect solution using high viscosity anti-separation grease.

Maintenance-free

No need to replace the grease for the life of the unit.
Can be attached in any position.

ABLE REDUCER

VRL series

| V R | L | - 090 | B | 7 | - K | 5 | - 19HB16 |

Mount code（※1）

Backlash   5・・・   5arc−min

Output style   K・・・   Shaft with key
                S・・・   Smooth shaft

Ratio   Single : 3、4、5、6、7、8、9、10

           Double : 15、16、20、25、28、30、35、40
                     45、50、60、70、80、90、100

Version

Frame size   070、090、120、155、205、235

Series name   VRL Series

Model name for ABLE reducer

※1 Mount code

Mount code varies depending on the motor.
Please refer to reducer selection tool or contact us for more information.

※2 Bushing will be inserted to adapt to motor shaft.

MEMO

Installation

1 Mounting procedure to the motor

**1** Wipe off anti-rust agent and oil on the motor shaft.

2 Remove the plug.

3 Turn the input shaft until the cap screw is seen. Make sure the cap screw is loosened.Please place reducer vertically on the flat surface so the motor mounting part faces up.

In case the bushing has been attached, Please fix it to the reducer as the drawing below.

4 Carefully insert the motor shaft into the input shaft. (It should be inserted smoothly) Make sure the motor flange is perfectly fit to the reducer's flange.
Tighten the motor installing bolts to the proper torque.(See table1)

2 Reducer installation

After confirming the installation surface is flat and clean, tighten the bolt using a torque wrench to the proper torque.(See table2)

5 Tighten the clamping bolt of the input shaft with torque wrench to the proper torque.(See table1)

6 Reinstall the plug. The procedure is done.

Table 1

Bolt size	Motor installing bolts		Clamping bolt	
	Nm	kgfm	Nm	kgfm
M3	1.1	0.11	1.9	0.18
M4	2.5	0.26	4.3	0.44
M5	5.1	0.52	8.7	0.89

※Recommended bolt：Strength 12.9

Servo Motor Manufacturer List

Servo Motor Manufacturer List

■ Japanese Servo Motor Manufacturer

Panasonic Corporation	TOSHIBA MACHINE CO.,LTD.
YASKAWA Electric Corporation	FANUC CORPORATION
Mitsubishi Electric Corporation	TAMAGAWA SEIKI CO.,LTD.
FUJI ELECTRIC CO.,LTD.	Nikki Denso
OMRON Corporation	Hitachi Industrial Equipment Systems Co.,Ltd.
SANYO DENKI CO.,LTD.	Sanmei Co.,Inc.
KEYENCE CORPORATION.	NIDEC SANKYO CORPORATION

■ Global Servo Motor Manufacturer

ALLEN BRADLEY	BECKHOFF
ABB	LENZE
B&R	LUST
BALDOR	PARKER
BAUMULLER	SAMSUNG
BOSCH REXROTH	SCHNEIDER
DELTA	SIEMENS
EMERSON（CONTROL TECHNIQUES）	TECO
ESTUN	GOLDEN AGE

＊ For inquries for other servomotor manufacturer and servomotor series, please consult our subsidiary in your area.

Safety Precautions

Cautions for storage

Whenever temporarily keeping the product, keep the following directions:

① Keep in a clean and dry place.

② Whenever storing outdoors or in a humid place, put in a box so that it does not directly contact rain or external air and cover with a vinyl sheet(Take a measure to prevent rust.).

■ Cautions for operation

■ When the reducer is delivered to you・・・

When the product delivered, please confirm that you received the exact same model you have ordered.

Please wipe out the input and output shaft of the reducer which is covered by anti-corrosive oil.

※ Please remove the rubber cap on the input shaft before you wipe the shafts.

※ Lubricant(grease) is already filled in the reducer.

It is available as it is.

■ Fixation & installation

● Avoid use in a place where rain or water drops directly.

・In case of use outdoors or in a place where dust and water drops, consult in advance.

● Install at 0℃ ~40℃ of surrounding temperature.

・In case of use at temperature out of the above-mentioned range, contact the headquarters and consult on this.

● Firmly fix with a bolt onto a solid stand without vibration.

● Install in consideration of convenience in repair and inspection.

■ Cautions prior to starting the operation

● Reducer can be used soon after arrival, since it has already been filled out with lubrication.

● At initial operation, check the rotating direction of the output shaft and then gradually apply load.

■ Cautions during operation

● Avoid overload.

● Ensure that input speed shall not be the number of revolutions beyond the specification.

● In the following cases, stop the operation and check the following points:

・If temperature sharply increases

・If an abnormal noise appears sharply

・If the number of revolutions becomes unstable sharply

● These may be caused by the following matters, so rapidly respond to it or contact us.

・Is it under overload condition?

・Is lubricant insufficient or deteriorated, or is lubricant of other type used?

・Is the axis, gear, and motor side damaged?

・Is jointing with other machines poor?

■ Disassembly

● ABLE REDUCER is designed not to allow disassembly.

■ Warranty

● A warranty period is one year after the product is delivered to you.

■ Lubricant use

● The ABLE REDUCER is of grease-seal type in all models.

A specified amount of grease is filled at factory release, so you can use as soon as it is delivered to you.

● It is impossible to exchange grease.

● In case of use at 0℃ ~40℃ of surrounding temperature at usual times, consider this in advance.

■ Daily check points

● Is reducer case temperature excessively high during operation? (Up to + 50℃ is not significant.)

● Is there an abnormal noise in the bearing, gear, etc?

● Is there abnormal vibration in the reducer?

＊ Upon an abnormal phenomenon, immediately stop the operation and contact us.

● Is there a lubricant leak?

＊ Upon an oil leak, contact us.

■Periodic check points
- ● Are there overload and abnormal rotation?
- ● Are free, sprocket, and reducer assembling bolts loose?
- ● Is there an abnormal condition in the electric system?
- ● Checkup and repair of major parts
- ※ Upon an abnormal condition, immediately stop the operation and contact us.
- ● Oil leak
- ※ Upon an oil leak, contact us.

■Scrapping

Whenever scrapping the ABLE REDUCER, classify the parts by material into industrial wastes as specified in the laws and regulations of self-governing bodies. Material of parts can be divided into four:

① Rubber parts : Oil seal, seat packing, rubber cap, seal used for bearing on the motor flange, etc.

② Aluminum parts : Motor flange, output shaft holder

③ Grease : Wipe off grease attached to parts with dry cloth and scrap into oils.

④ Iron parts : Parts other than those mentioned in the above

WARRANTY PROVISION

・Warranty scope is limited to the use in Japan only.

・Warranty scope is the delivered product only.

■ THE EXPENSES AND LOSSES THAT MENTIONED BELOW ARE NOT INCLUDED IN WARRANTY

1)The transport charges for repairing of our products.

2)The fee for the removal operation, reinstallation and other related operation in case our product is installed to the other machine.

3)The loss of the chances of use and indirect damages caused by the interruption of the services caused by our product's defects.

4)All other secondary expenses and losses.

You can download the CAD drawings(2D・3D) of ABLE REDUCER VRS, VRL, VRB series.

http://www.nidec-shimpo.co.jp/en/

Choose from 「Make a selection from the motor list」 and 「Make a selection from load condition」.

QUALITY

We are making efforts for quality improvement on the
basis of the concept of total quality control.

Deming Award to be given to enterprises practicing
excellent quality control

■NIDEC-SHIMPO has obtained ISO 9001/ISO 14001 certification of quality assurance.

ISO 9001
■Range of registrations

Design, development, manufacturing, and
relevant service(refurbishing) of the following products:

●CVT
●Reducer
●Electronic measuring instrument(Digital revolution indicator/ Stroboscope)
●Control units(digital controller)
●Ceramic devices(motor plane/kiln)

ISO 14001
■Range of registrations

Design, development, manufacturing, and refurbishing
of CVT, reducer, measuring instruments, control units,
ceramic devices, and other industrial devices

●Factories:
